

*Utricularia fulva*—Near Darwin, Australia. P. Taylor/Kew photo. Close shot, Peter Taylor acknowledges this to be his favorite species.

*Utricularia chrysantha*—Australia. Bill Lavarack photo (P. Taylor/Kew collection). Note particularly stocky, thick almost succulent peduncle in this very dry growing situation.

*Utricularia leptoplectra*—Near Darwin, Australia. P. Taylor/Kew photo.

*Utricularia jamesoniana*—South America. Carlyle Luer photo (P. Taylor/Kew collection).
