New cultivars-----	26
Carnivorous plant with a carnivorous insect eating a carnivorous vertebrate -----	31

6TH ANNUAL WORLD CARNIVOROUS PLANT DAY MAY 6, 2026

Join us for the 6th annual WCPD on Wednesday, May 6, 2026!

The ICPS is proud to host this free, global virtual celebration. Throughout the day, we will share videos on the ICPS Facebook, Instagram, and YouTube, featuring a worldwide selection of botanists, horticulturalists, and plant enthusiasts sharing their knowledge and experiences with carnivorous plants.

There will also be a photo contest to celebrate the beauty and diversity of these extraordinary plants. All photo contest entries must be submitted by **April 15, 2026**. Learn more by visiting our website <https://www.carnivorousplants.org/about/PhotoContests/PhotoContestRules>.

If you own a carnivorous plant nursery and would like to offer a discount on WCPD for your customers, we would be happy to amplify your efforts! Or if you are interested in contributing a video or participating as a featured speaker for World Carnivorous Plant Day, please contact me.
